## EDUCATION

---

### Georgia State University

*B.B.A. in Computer Information Systems (Data Analytics)*

• **GPA: 3.90 / 4.00** — **Honors:** President's List, Zell Miller Scholar

• **Relevant Coursework:** Managing with AI, Generative AI, Systems Analysis, Database Management, Data Analytics, Information Security, Python Programming

Atlanta, GA

*Expected May 2027*

## TECHNICAL SKILLS

---

**AI & Data Analytics:** Vertex AI (GCP), RAG Pipelines, Vector Databases (Actian), OpenAI API, Tableau, PostgreSQL, MongoDB, Excel (VBA)

**Languages & Frameworks:** Python (Pandas/NumPy), SQL, JavaScript, React, Node.js, FastAPI, Flask

**Tools & Infrastructure:** Datadog, ServiceNow, AWS (S3, CloudFront), Git, Jira, Railway, Linux, Stripe API, Postman

**Core Competencies:** Technical Documentation, KPI Analysis, SDLC, Workflow Automation, Agile Methodology

## EXPERIENCE

---

### Equifax

*Technical Analyst Intern – Global Platforms*

• Engineering an AI-driven Incident Response Management platform using **Google Cloud Vertex AI** to predict and mitigate critical enterprise IT outages, safeguarding continuous operations for a **\$5B+** global data infrastructure.

• Developing real-time dashboards that aggregate and analyze disparate system telemetry including **Datadog** monitoring metrics, infrastructure logs, **ServiceNow** notifications, and recent code deployments to identify systemic root causes and formulate instant remediation solutions.

• Architecting early-warning predictive signals and automated post-incident technical documentation, accelerating Mean Time to Resolution (MTTR) and minimizing downtime risks for over **15,000 corporate employees across 24 countries**.

Alpharetta, GA

*May 2026 – Present*

### ECP Consulting Services, LLC

*Office Manager*

• Orchestrated daily operations for a DFCS service provider, maintaining **100% compliance** in payroll and contracts.

• Developed automated reporting logic in Excel, reducing manual administrative overhead by **25% (5+ hours/week)**.

• Deployed cloud-based digital record-keeping, improving data retrieval speed for state audits by over **40%**.

Atlanta, GA

*Sep 2025 – Feb 2026*

### T-Lines Logistics

*Logistics & Office Administrator*

• Engineered dynamic **Excel inventory dashboards** with automated reorder triggers, reducing stock-outs by **15%**.

• Managed high-volume vendor accounts and processed **\$50k+** in monthly inventory POs with zero discrepancies.

Atlanta, GA

*Jul 2024 – Jan 2025*

## TECHNICAL PROJECTS

---

**GreenWashers** — [greenwashing-detection.up.railway.app](https://greenwashing-detection.up.railway.app) — *OpenAI, RAG, Python*

*Feb 2026*

• Engineered an **AI-powered ESG platform** auditing sustainability claims against regulatory data via RAG pipelines.

• Reduced manual research time by **80%** through vector similarity search and citation-backed report generation.

**GT Notes** — [gtnotes.org](https://gtnotes.org) — *React, Node.js, Express, MongoDB, AWS*

*Aug 2025*

• Developed a student resource platform scaling to **480+ active users** to seamlessly share and locate curated lecture notes.

• Optimized backend architecture and MongoDB indexing to achieve **sub-second search latency**.

**CourtVision** — *Python, Flask, PostgreSQL, Stripe API, AWS*

*Apr 2025*

• Developed a full-stack booking engine with **predictive scheduling logic** and secure **Stripe API** integration.

• Designed a PostgreSQL schema to handle real-time transaction ledgers and user authentication.

## LEADERSHIP & ACTIVITIES

---

• **Association for Information Systems (AIS)** • **progsu @ GSU** • **FinTech @ GSU**
