EDUCATION

Georgia State University

Atlanta, GA

B.B.A. in Computer Information Systems (Data Analytics)

Expected May 2027

- **GPA: 3.90 / 4.00** — **Honors:** President's List, Zell Miller Scholar
- **Relevant Coursework:** Managing with AI, Generative AI, Systems Analysis, Database Management, Data Analytics, Information Security, Python Programming

TECHNICAL SKILLS

AI & Data Analytics: RAG Pipelines, Vector Databases (Actian), OpenAI API, Tableau, PostgreSQL, MongoDB, Excel (VBA)

Languages & Frameworks: Python (Pandas/NumPy), SQL, JavaScript, React, Node.js, FastAPI, Flask

Tools & Infrastructure: AWS (S3, CloudFront), Git, Jira, Railway, Linux, Stripe API, Postman

Core Competencies: Technical Documentation, KPI Analysis, SDLC, Workflow Automation, Agile Methodology

EXPERIENCE

Equifax

Alpharetta, GA

Incoming Technical Analyst Intern

Summer 2026

- Incoming Technical Analyst Intern selected for a competitive program supporting data analysis and system optimization initiatives.

ECP Consulting Services, LLC

Atlanta, GA

Office Manager

Sep 2025 – Feb 2026

- Orchestrate daily operations for a DFCS service provider, maintaining **100% compliance** in payroll and contracts.
- Developed automated reporting logic in Excel, reducing manual administrative overhead by **25% (5+ hours/week)**.
- Deployed cloud-based digital record-keeping, improving data retrieval speed for state audits by over **40%**.

T-Lines Logistics

Atlanta, GA

Logistics & Office Administrator

Jul 2024 – Jan 2025

- Engineered dynamic **Excel inventory dashboards** with automated reorder triggers, reducing stock-outs by **15%**.
- Managed high-volume vendor accounts and processed **\$50k+ in monthly inventory POs** with zero discrepancies.

TECHNICAL PROJECTS

GreenWashers — greenwashing-detection.up.railway.app — *OpenAI, RAG, Python* February 2026

- Engineered an **AI-powered ESG platform** auditing sustainability claims against regulatory data via RAG pipelines.
- Reduced manual research time by **80%** through vector similarity search and citation-backed report generation.

GT Notes — gtnotes.org — *React, Node.js, Express, MongoDB, AWS*

August 2025

- Co-founded a student resource platform scaling to **480+ active users** to share and find lecture notes.
- Optimized backend architecture and MongoDB indexing to achieve **sub-second search latency**.

CourtVision — *Python, Flask, PostgreSQL, Stripe API, AWS*

April 2025

- Developed a full-stack booking engine with **predictive scheduling logic** and secure **Stripe API** integration.
- Designed a PostgreSQL schema to handle real-time transaction ledgers and user authentication.

LEADERSHIP & ACTIVITIES

- **Association for Information Systems (AIS)** • **Cybersecurity Club @ GSU** • **FinTech @ GSU**
